thermochimica acta

Contents

(Abstracted/Indexed in: Curr. Contents: Phys., Chem. Earth Sci.; Eng., Technol. Appl. Sci., Chem. Abstr., PASCAL/CNRS)

Special Issue: Calorimetric and Thermodynamic Studies in Biology, A Collection of Papers Presented at the Ninth Conference of the International Society for Biological Calorimetry, Berlin-Schmerwitz, 27–31 May 1994, edited by R.B. Kemp and B. Schaarschmidt

Preface xi

Bioenergetics of a highly adaptable brackish water polychaete
D. Fritzsche and J.-A. von Oertzen (Rostock, Germany) 1

Energy strategy of *Corophium volutator* (Pallas, 1766) (*Amphipoda*) population from the Gulf of Gdańsk
A. Dobrzycka and A. Szaniawska (Gdynia, Poland) 11

Relation between substrate-induced respiration and heat loss from soil samples treated with various contaminants
A. Tancho, R. Merckx, R. Schoovaerts and K. Vlassak (Heverlee, Belgium) 21

Degradation of naphthalene by *Pseudomonas* sp. strain KR3 investigated by flow calorimetry
K. Fiebich, W. Thumm and A. Kettrup (Oberschleißheim, Germany) 29

Calorimetric and respirometric characteristics of the decomposition of animal wastewaters in soil
J.E. Dziejowski (Olsztyn, Poland) 37

Comparative investigations on the effect of environmental salt stress on energy metabolism of amphipods estimated by ^{31}P NMR spectroscopy and microcalorimetry
J.H.E. Koop (Düsseldorf, Germany), J. Zange (Cologne, Germany) and M.K. Grieshaber (Düsseldorf, Germany) 45

Size spectra of heat production of microplankton of Sevastopol Bay
A. Lopukhin and Y. Kamenir (Sevastopol, Ukraine) 53

Pigment-dependent light influence on the energetics of *Serratia marcescens*
I.N. Ryazantseva, I.N. Andreyeva, G.S. Klementyeva, T.I. Ogorodnikova, V.Ye. Petrov (Kazan, Russia) 63

1994 And all that: ecology in a calorimeter!
L. Gustafsson (Gothenburg, Sweden) 69

Thermodynamic analysis of *Methanobacterium thermoautotrophicum*
N. Schill and U. von Stockar (Lausanne, Switzerland) 71

On-line detection of baseline variations through torque measurements in isothermal reaction calorimeters
L. Menoud, I.W. Marison and U. von Stockar (Lausanne, Switzerland) 79

Impact of carbon dioxide evolution on the calorimetric monitoring of fermentations
M. Meier-Schneiders, F. Schäfer, U. Grosshans and C. Busch (Stuttgart, Germany) 85

Metabolic uncoupling in *Saccharomyces cerevisiae*
C. Larsson (Gothenburg, Sweden), U. von Stockar, I. Marison (Lausanne, Switzerland) and L. Gustafsson (Gothenburg, Sweden) 99

On-line heat flow measurement in laboratory fermenters
B.H.A. van Kleeff (Delft, The Netherlands) 111
Energetic investigation of *Saccharomyces cerevisiae* during transitions. Part 1. Mass balances
P. Duboc and U. von Stockar (Lausanne, Switzerland) 119
Energetic investigation of *Saccharomyces cerevisiae* during transitions. Part 2. Energy balance and thermodynamic efficiency
P. Duboc and U. von Stockar (Lausanne, Switzerland) 131
Influence of malignancy and cyctostatic treatment on microcalorimetric behaviour of urological tissue samples and cell cultures
C. Blüthner-Hässler, M. Karnebogen, W. Schendel, D. Singer, M. Kallerhoff, G. Zöller and R.H. Ringert (Göttingen, Germany) 145
Cellular thermogenesis in L-929 mouse fibroblasts. The influence of oxygen availability on growth, heat production and intermediary metabolism
J. Nittinger and P. Fürst 155
Prediction of recovery after ischemia. A microcalorimetric and biochemical study of rat liver tissue
F. Bach (Homburg/Saar, Germany), D. Singer (Göttingen, Germany), M. Bauer (Homburg/Saar, Germany), H.J. Bretschneider (Göttingen, Germany) and R. Larsen (Homburg/Saar, Germany) 161
Measurement of oxygen consumption and heat production in plasma from uremic patients on chronic dialysis treatment
L. Ljunggren, M. Monti, H. Thysell and A. Grabb (Lund, Sweden) 173
Energetic study of human lymphocytes and the metabolic response to antigenic stimulation
D. Gebreselassie, L. Ljunggren and M. Monti (Lund, Sweden) 177
Thermogenic effect of two β-adrenoceptor blocking drugs, propranolol and carvedilol, on skeletal muscle in rats. A microcalorimetric study
B. Fagher and M. Monti (Lund, Sweden) 183
Beta-adrenoceptor antagonist therapy in hyperthyroidism: effects on lymphocyte metabolic activity and the relation between aerobic and anerobic metabolism in lymphocytes
S. Valdemarsson and M. Monti (Lund, Sweden) 191
Determination of the specific heat capacity of healthy and tumorous human tissue
K. Giering, I. Lamprecht, O. Minet and A. Handke (Berlin, Germany) 199
Comment on the state of development in applied calorimetry in 1994
E.H. Battley (Stony Brook, NY, USA) 207
Hypoxia and anoxia in insects: microcalorimetric studies on two species (*Locusta migratoria* and *Manduca sexta*) showing different degrees of anoxia tolerance
G. Wegener and T. Moratzky (Mainz, Germany) 209
Microcalorimetric determination of blood heat output in human neonates
D. Singer, D. Stege, Ch.P. Speer and W. Schröter (Göttingen, Germany) 219
Size effects on metabolic rate in cell, tissue, and body calorimetry
D. Singer, O. Schunck (Göttingen, Germany), F. Bach (Homburg/Saar, Germany) and H.-J. Kuhn (Göttingen, Germany) 227
Calorimetric investigations on thermoregulation and growth of wax moth larvae *Galleria mellonella*
E. Schmolz and O. Schulz (Berlin, Germany) 241
Studies on insect growth regulating (IGR) and toxic effects of *Ledum palustre* extracts on *Tenebrio molitor* pupae (*Coleoptera, Tenebrionidae*) using calorimetric recordings
A. Kuusik, M. Harak, K. Hiiesaar, L. Metspalu and U. Tartes (Tartu, Estonia) 247
A portable unit for direct calorimetry of small aquatic animals
K. Winckler (Berlin, Germany) 255
Direct and indirect calorimetric investigations on some snakes
B. Schaarschmidt, F.-R. Matuschka and I. Lamprecht (Berlin, Germany) 261
Calculating locomotor activity and energy utilisation factors from indirect calorimetric measurements
U. Frenz, L. Aust and R. Noack (Bergholz-Rehbrücke, Germany) 271

Specific oxygen consumption in two life stages of the cichlid fish *Cichlasoma nigrofasciatum*
L. Fidhiany (Bogor, Indonesia) and K. Winckler (Berlin, Germany) 283
A method for continuous direct calorimetric measurements of energy metabolism in intact hornet (*Vespa crabro*) and honeybee (*Apis mellifera*) colonies
E. Schmolz, I. Lamprecht and B. Schircker (Berlin, Germany) 293
A portable, battery-powered unit for oximetry on small aquatic animals
K. Winckler (Berlin, Germany) and L. Fidhiany (Bogor, Indonesia) 303
Physical properties of a vacuum-deposited thermopile for heat measurements
G.W.H. Höhne, A.E. Bader and St. Hönle (Ulm, Germany) 307
Whole-body calorimetry in the 1990s and beyond
M.J. Dauncey (Cambridge, UK) 319
A gas perfusion microcalorimeter for studies of plant tissue
P. Bäckman, R.W. Breidenbach, P. Johansson and I. Wadsö (Lund, Sweden) 323
Site-fitness and growth-rate selection of *Eucalyptus* for biomass production
R.S. Criddle, T.S. Anekonda, R.W. Breidenbach (Davis, CA, USA) and L.D. Hansen (Provo, UT, USA) 335
A differential photomicrocalorimetric method for investigating the rate of energy storage in plants
V.Ye. Petrov, A.Ju. Alyabyev, N.L. Loseva, G.S. Klementyeva and V.I. Tribunskich (Kazan, Russia) 351
Aspects of the energetic balance of plant cells under different salt conditions
N.L. Loseva, A.Ju. Alyabyev, G.G. Rackimova and R.I. Estrina (Kazan, Russia) 357
Stability and reliability of ontogenesis
A.I. Zotin (Moscow, Russia) 363
Enthalpy convergence temperatures: proteins and model compounds
R. Ragone, P. Stiuso and G. Colonna (Naples, Italy) 371
Thermodynamic aspects of the molecular recognition of drugs by human serum albumin
H. Aki, M. Goto and M. Yamamoto (Fukuoka, Japan) 379
Calorimetry of plants: a snapdragon's view
R.B. Kemp (Dyfed, UK) 389
